

Instruction of installing MTP driver

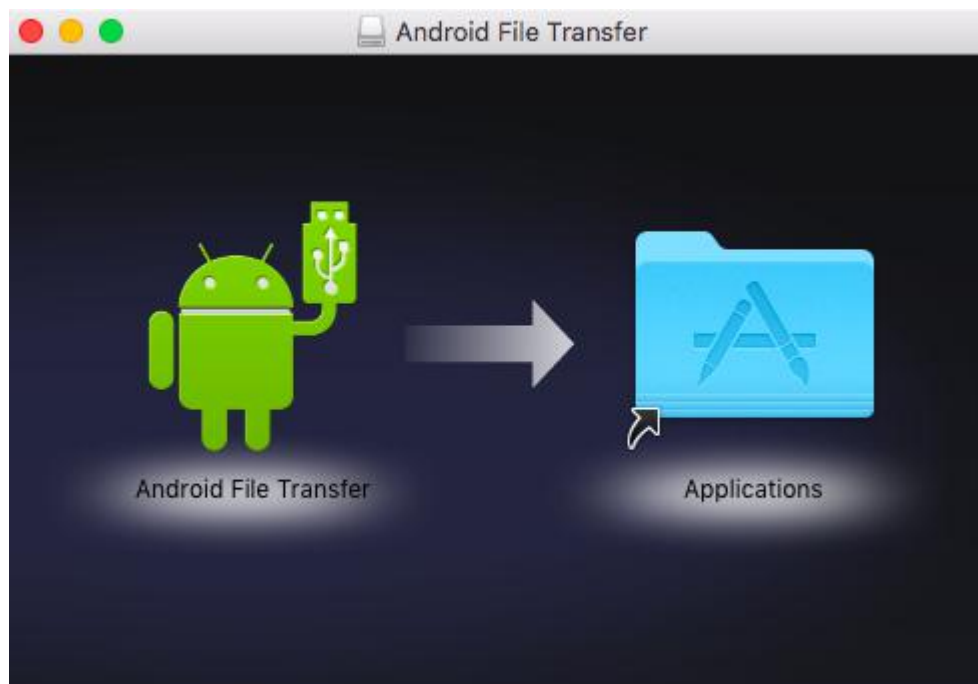

1. Connect the device to the Mac computer with a Type C to Micro USB cable, and then you'll find a device "NO NAME" emerged in your computer devices. Double click to enter the device.

2. Double click to enter the sub-folder "Mac" and copy the "Android File Transfer.dmg" file under the "MAC OS MTP Client" sub-folder to the desktop.

3. Double click to enter the file, then drag the "Android File Transfer" file to the "Applications" .

4. Enter "Applications", and double click the "Android File Transfer". Then you can manage the files stored in your device.
