# Instruction of installing MTP driver

1. Connect the player to the computer with a Type C USB data cable. And then you will find a removable disk "FiiO driver" displayed in the Windows Explorer. Double click the disk, you will find two folders as shown below.

2. Then click the folder named "Windows". Copy the application file under the "MTP driver" folder to a local folder on your computer. Then unplug the player and disconnect from the computer.

Note: Please DO NOT connect the player to the computer when installing the driver.

3. Double click the copied application file to start the installation. After the installation completed,connect the player to the computer.The player will list as a portable device in Windows explorer when the driver is finished. Now you can open it to access and manage the files in your player.
